

A luxury watch with a diamond-set bezel and a crown jewel of a kingfisher bird on the dial. The watch is shown from a top-down perspective, highlighting the intricate details of the dial and the surrounding metal case. The kingfisher bird is the central focus, with its vibrant blue, orange, and red feathers rendered in a highly detailed, almost lifelike manner. The watch is set against a dark background, which makes the colors of the bird and the sparkle of the diamonds stand out.

## ***Crown Jewels of Nature***

*Angular Momentum is a company renowned for their creativity and innovative design and superb craftsmanship.*

Angular Momentum has launched a new collection of **Verre Églomisé** Artisan timepieces called the **Crown Jewels of Nature**, with portraits of beautiful birds as the main theme forming the centerpiece of the watch crystal. Housing a self-winding movement, the bezel is “serti en pavé” set with 1.500 ct. TW VVS brilliant cut diamonds.

Angular Momentum presents its timepieces as individual works of art. The birds truly seem to spring to life from the watch crystal, a testament of the artisan’s good eye for detail, long hours of patience and superb craftsmanship.

### ***Verre Églomisé***

The art of Verre Églomisé consists of mastering minute details to give the work a presence beyond its size. Verre Églomisé is a rare art and calls for exceptionally good eyes and trained hands.

Today Angular Momentum applies the rare decorative skills that create watches as individual works of art.

To complete a dial, the artisan spends many days.

### ***Patent CH686988***

Angular Momentum watches are well-known for their unique designs that set them apart from many other styles of watches. Each watch is created with a revolving disk system that is reliable and artistic. It provides the wearer with a revolutionary but simple way to measure time. The traditional watch has the hour hand that revolves around the

solid background. The Angular Momentum watch patent uses disks instead of this customary way of designing watches.

The hour hand is printed or painted on a glass or metal disk that will turn as the hour’s pass making it easier to tell time while still being reliable and durable. This Revolving-Disk-System is known for its great quality and workmanship. They are all created to be comfortable when worn and the designs are both stylish and durable with a variety of shapes and styles designed for men and women.

Solid 18 Kt. white gold case +/- 41.00 mm, serti en pavé, 1.500 ct TW VVS Brilliants, mechanical selfwinding movement, digital time display, (Patent CH686988)
