„What Time is it?“

R.D.S. Classic

Revolving-Disk-System - Patent CH686988

Revolving-Disk-System (Patent Ch 686988)

In 1999, Angular Momentum has launched its first watch collection „The Pioneers“-

This Collection was featuring the Revolving-Disk-System (R.D.S.), an invention by Angular Momentum, registered in Switzerland as technical Patent under the number CH 686988. The technical description simply defines, „that a watch hand can be replaced by a disc“.

In the past 10 years, Angular Momentum has created and manufactured a wide range of watches with unique time displays with Revolving and jumping Disks, based and developed on the original R.D.S.-Technology such as World Time Watches, Traveler Watches, Digital Watches, Moon Phase Watches, Digital-Analogue Regulators, BigDate Watches and many many more.

Now as a homage to its first Collection of 1999, Angular Momentum has released a new and overworked and sophisticated version of a classic R.D.S timepiece, named ***R.D.S. Classic***

Position 12 o'clock, where the hours are read on the disk

Current time: 01:02H

Minute Hand

shows the minutes the conventional way

Revolving Hour Disk with the numbers of the hours, arranged counterclockwise

01:04H

02:19H

04:43H

01:05H

R.D.S Classic
